

The AMR-EDUCare project targets the prevention and reduction of antimicrobial resistance (AMR)'s health burden by filling educational gaps on AMR for both clinical and non-clinical health workforce. The project aims to develop educational material to strengthen continuous professional development and training of the healthcare workforce to reduce the burden of and exposure to antimicrobial resistance.

Antimicrobial
prescribing
optimisation

Antimicrobial
waste reduction
& management

Patient empowerment

The courses will follow a unique approach targeting behavioural change in doctors, nurses, pharmacists, and health managers and improving their digital skills to address AMR.

All health professionals will have online access to the courses, which will be translated from English into the languages of the countries participating in the project: Greece, Hungary, Italy, Lithuania, Portugal and Spain.

Subscribe to the project newsletter to be the first to know when courses are available.
